Who we are

Köpp Experts (Köpp Laudos & Perícias) is a Brazilian forensic engineering and appraisal firm founded and led by engineer Diego Köpp. We serve courts, banks, insurers and law firms across Brazil in judicial expert work, construction defect investigation, real estate and machinery valuation, and insurance claim analysis.

Core practice areas

- Court-appointed expert work and party-appointed technical assistance (Brazilian Civil Procedure Code)
- Construction defect and pathology investigation
- Real estate appraisal under NBR 14653 (urban, rural, industrial)
- Machinery and equipment valuation
- Insurance claims: storm, structural and property damage
- Document and signature forensics (questioned documents)

What we offer US firms

- Site inspections and evidence collection anywhere in Brazil, documented to litigation standards
- Brazilian code expertise: NBR standards, performance code (NBR 15575) and local construction practice
- Navigation of Brazilian civil procedure: court-appointed experts, quesitos, technical assistant role
- Court-admissible reports in Portuguese, with English executive summaries for your file
- Local liaison with insurers, adjusters, law firms and courts
- Competitive Brazil-based cost structure for field work

Why a correspondent matters

Forensic work is local by nature. Codes, procedure, language and site access decide outcomes. A vetted Brazilian correspondent turns a jurisdictional blind spot into a documented, defensible file.

How an engagement works

1

Contact & scope

Case briefing, conflict check and scope definition, typically within 48 hours.

2

Field execution

Inspection, testing coordination and evidence collection at the Brazilian site.

3

Analysis

Causation and code analysis under NBR standards and Brazilian practice.

4

Bilingual reporting

Portuguese court-ready report with an English executive summary.
